Note that:

- 1) Everybody has to use the A1 poster format given in the course's website under Course Documents menu.
- 2) Everybody has to use the above-given identification coda for each project. Try to find all information required, you will be graded according to amount, accuracy and consistency of the information you submitted for the case study identification data.
- 3) Everybody has to write on his/her own a project information paragraph of 300 words. You can divide the paragraph in small paragraphs under the illustrations or you can write a total paragraph to describe the general information of the project. You will be graded over the information you provided for the project description paragraph.

SUBMISSION FORMAT

A1 posters (to hang vertically) including the case study identification information given above, project description paragraph, Google Earth site plan of the project, drawings of the project (plans, sections, elevations, conceptual diagrams and 3D perspectives and illustrations) and photographs of the project.

You will be graded 40% points over all the information and illustrative data you will provide according to the given format above.
